INVESTMENT: SPECIAL NATIONAL FEATURE OR CONTRACT RATES APPLY

What is next for Canadian energy? With volatility being the new normal for Canadian oil and gas and a lack of export capacity dampening investment, companies are pushed to innovate, to lower their costs, create as much cash flow as they can and continue to grow into the 2020s. This special feature, produced in collaboration with the Energy Roundtable, explores insights on how to navigate today's energy markets.

Proposed topic highlights:

- The energy outlook – what's next for Canadian energy?
- Financing and M&A trends in Canadian energy
- Industry 4.0: Operational excellence by scaling data and advanced analytics
- First Nations ownership of export infrastructure and market access
- Electrification of Canada's resource sector
