Hearing loss is among the fastest growing – and one of the most prevalent – chronic conditions facing Canadians, with an estimated 4.6 million adults reporting at least mild hearing loss in the speech-frequency range and an even larger percentage having some degree of hearing loss in the high-frequency range. This special feature will explore what hearing loss means for Canadians and highlight the organizations, initiatives and advice that are making a difference.

Proposed topic highlights:

ADVOCACY & ENGAGEMENT – Agencies and initiatives dedicated to improving quality of life for people with sensory impairment.

TECHNOLOGY & INNOVATION – Assistive technology and social innovation for better outcomes.

TIMELY INTERVENTIONS – From early detection and treatment to mitigating risks of the breakdown of social networks associated with hearing loss.

ADVICE – Tips and advice based on professional insights and scientific evidence.
