Technology and innovation are called upon to help us solve some of the most pressing problems of the world today, such as global health, climate change and economic development. This special feature will explore the impact of technology and innovation on a wide range of sectors, including finance, energy, health, entertainment and education.

Proposed topic highlights:

Health and well-being – Leveraging cutting-edge technology for advancing health.

Sustainability – Improving environmental and energy performance, reducing emissions.

Boosting business operations – AI and data analysis improving business outcomes.

Training and support – Leveraging investments and next generation training for sector growth.
