INVESTMENT: INTEGRATED CONTENT FEATURE OR CONTRACT RATES APPLY

With the huge increase in online data sharing, it's no surprise that the resulting cost of security breaches is also on the rise. In fact, \$6.35 million was spent in 2020 against cyber infringements, a 6.7% increase from the previous year. Since breaches can be caused by system glitches, human error as well as malicious attacks, its important that companies know how to minimize the risk. This special feature, scheduled to coincide with October Cybersecurity Awareness Month will provide insights and solutions to combat this growing business issue.
