Accounting is undeniably changing, largely because of intelligent technology, including machine learning, AI, and blockchain. While advanced systems handle much of the repetitive work, humans are the crucial link between data and clients. This special feature will explore the trends that affect the future of the accounting profession in Canada.

Proposed topic highlights:

Advocacy and education – Advancing understanding and awareness about the accounting profession.

Expert advice in difficult times – Canadian accountants finding efficiencies amidst disruption.

Trends and impact – Shaping the future of accounting and the types of jobs that are available.

Technology and innovation – Automation, minibots, machine learning and adaptive intelligence as part of the finance team.
