Today's rapid technology advances are often called the fourth industrial revolution. At their core is the development of artificial intelligence (AI), which frees devices and sensors from dependence on human decision-making. This special feature explores how a wide range of AI capacities – from visual and auditory perception and reading skills to the ability of accurate autonomous decision-making and continuous performance improvements – are shaping lives today and in the future. It is also timed strategically for the World Summit Americas 2021

Proposed topic highlights:

SHAPING THE FUTURE – How AI is shaping fields like health care, space exploration, robotics, intelligent information systems and more.

AI FOR GOOD – Looking at the social, moral, ethical and legal implications of AI adoption.

INTERDISCIPLINARY APPROACH – Robust solutions informed by multiple fields of expertise.
