Transportation, the movement of goods and people, is a key element of a functioning economy and society. Yet it is also one of the largest sources of emissions in Canada, leading to adverse health and environmental impacts. This special feature will explore the state of transportation in Canada as well as efforts and initiatives that are helping the country meet its greenhouse-gas emission targets and combat climate change.

**Proposed topic highlights:**  
**ADVOCACY & SUPPORT** – Advocates, organizations and incentives dedicated to reducing the environmental impact of transportation.  
**OUTLOOK** – Profiling options that deliver reduced emissions.  
**TECHNOLOGY & INNOVATION** – Cleantech and product development breakthroughs.  
**CANADA'S CONTRIBUTION** – Leadership in innovation, infrastructure and green metals extraction.
