

# Family oral health

**PUBLICATION DATE:** Monday, January 23  
**GET INVOLVED BY:** Monday, December 5  
**PRINT/DIGITAL AD MATERIAL DUE:** Monday, January 16

INVESTMENT: SPECIAL NATIONAL FEATURE/CONTRACT RATES APPLY

Oral healthcare is imperative to good overall health, yet many Canadian families with lower incomes often face challenges in accessing an appropriate level of quality treatment. There is a growing recognition for the need for equitable access to oral healthcare for families, and this special feature will highlight efforts across the country that enable all Canadian families to thrive with the support of oral healthcare providers.

**Proposed topic highlights:**

- STRATEGIES** — Enhancing health and well-being for families
- ADVOCACY** — Promoting the importance of oral health for all families
- EXPERT ADVICE** — How healthcare providers are making a difference in the industry.
- BREAKING BARRIERS** — Equitable access for all Canadians

EXPLORING THE HEART-BRAIN CONNECTION

**LEADING HEALTH CHARITIES BRAIN CANADA AND HEART & STROKE JOIN FORCES IN MULTIDISCIPLINARY RESEARCH ENDEAVOUR**

Significant scientific and technological advances enable a more thorough investigation of the heart-brain connection. The brain, heart and one specialist can provide all the answers. This requires big and diverse team effort with experts from cardiology, engineering, genomics, neuroscience, epidemiology, health science and population health coming together to progress our research.

Brain Canada, the national funder of the brain research community, and Heart & Stroke, the national funder of cardiovascular research, have joined forces to create a new research program.

"We're excited to be collaborating with Heart & Stroke and congratulate them on their vision and leadership in people with heart failure have a better quality of life and a better chance of disease-free survival," says Dr. Deacon, the research team's lead.

"We know that self-monitoring, such as using their medication and watching what they eat or how much they drink, is critical for people with heart conditions," he adds. "We are discussing these and more potential research directions."

Medical has a

Leading health charities Brain Canada and Heart & Stroke are joining forces to create a new research program. The program will focus on understanding the heart-brain connection and how it affects people with heart failure. The program will also focus on understanding the heart-brain connection and how it affects people with heart failure. The program will also focus on understanding the heart-brain connection and how it affects people with heart failure.
